

January 2026

MEDICARE PATIENTS

The annual deductible for all Medicare Part B beneficiaries is **\$288 in 2026, a \$31 increase from the annual deductible of \$257 in 2025. Medicare's annual threshold will pay \$2,480 in 2026 for PT and SLP combined per calendar, a \$70 increase from 2025.** Once the threshold has been used your therapist will determine if your treatment is medically necessary. If your treatment is determined to be medically necessary than we can apply the KX modifier and continue your treatment until we reach \$3,000. Your therapist will review again if your treatment is medically necessary or if discharge is necessary. If you wish to continue treatment after your therapist deems it is not medically necessary you will be required to fill out an ABN form prior to any future treatment.
